PUBLIC HEARINGS

1. Report dated September 20, 2012 from the General Manager of Infrastructure Services regarding Paquette-Whitson Municipal Drain. **4 - 85**
(ELECTRONIC PRESENTATION) (RECOMMENDATION PREPARED)
 - Ronald. W. Norton, P.Eng., Drainage Engineer**(ENGINEER'S REPORT UNDER SEPARATE COVER)**

(The report recommends that the City of Greater Sudbury accept the engineer's report dated September 20, 2012 from K. Smart Associates Limited for the Paquette-Whitson Municipal Drain and give first and second reading to a draft by-law to provide for the Paquette-Whitson Municipal Drain.)
2. Report dated September 20, 2012 from the General Manager of Infrastructure Services regarding Horizon 2011 Municipal Drain Public Hearing. **86 - 95**
(ELECTRONIC PRESENTATION) (RECOMMENDATION PREPARED)

- Ronald W. Norton, P.Eng., Drainage Engineer

(ENGINEER'S REPORT UNDER SEPARATE COVER)

(The report recommends that the City of Greater Sudbury accept the engineer's report dated September 20, 2012 from K. Smart Associates Limited for the Horizon Municipal Drain and give first and second reading to a draft by-law to provide for the Horizon Municipal Drain.)

Adjournment

LISA OLDRIDGE, DEPUTY CITY CLERK

LIZ COLLIN, COMMITTEE ASSISTANT

Request for Decision

Paquette-Whitson Municipal Drain

Presented To:	Hearing Committee
Presented:	Wednesday, Oct 03, 2012
Report Date	Thursday, Sep 20, 2012
Type:	Public Hearings

Recommendation

THAT the City of Greater Sudbury approve the Engineer's report dated February 8, 2012 from K. Smart Associates Limited for the Paquette-Whitson Municipal Drain and give First and Second reading to a draft By-Law to provide for the Paquette-Whitson Municipal Drainage Works in the City of Greater Sudbury; and

THAT the City cost share of the project be funded in the amount of \$3,500,000 as previously approved in the 2010 to 2016 Capital Budgets; from the Stormwater Reserve Fund in the amount of \$119,000 and from the Municipal Drains Reserve Fund in the amount of \$1,512,385, all in accordance with the report from the General Manager of Infrastructure Services dated September 20, 2012.

Introduction

This report provides a general overview of the Paquette-Whitson Municipal Drain project and its linked relationship to the control of historic high flood flows on the Whitson River. It further seeks the approval of the Hearing Committee and Council of the City of Greater Sudbury of the project Engineer's Report and the work necessary to implement the project shown on the plan attached to this report as Appendix "A".

Background

In 1999, the former City of Valley East Council approved an Ontario Drainage Act petition to provide an improved drainage outlet for various City roads and Regional Road 80 within the subwatershed of Tributary 8A to the Whitson River. K. Smart Associates Limited was appointed by Council to complete an Engineer's report to address the drainage improvement. The work of the Engineer was suspended in 2000 as a result of the amalgamation that created the City of Greater Sudbury. In 2004, the City of Greater Sudbury approved a further petition for the Paquette-Whitson Municipal Drain as a result of impending development within the subwatershed and K. Smart Associates Limited were reconfirmed as the Project's Drainage Engineer. Development activity slowly proceeded within the Tributary 8A subwatershed and preliminary engineering was reactivated within the pace of development and available City budgets within the 2005 to 2008 timeframe.

In 2009-2010, Lifestyle Homes proposed a development on the former Campeau property south of Dominion Drive. In addition, the proposed Cerilli Valley Centre commercial development along Municipal Road 80 was in the planning process. Both developments brought a new impetus to implement the Paquette-Whitson Municipal Drain. At an early stage of these developments, it was determined that significant portions of the developments lay within the flood plain of the Tributary 8A watercourse and the Whitson River. The Nickel District Conservation Authority (NDCA) advised that the developments could only proceed if flood plain issues were addressed. The NDCA is mandated by the Province of Ontario to regulate the Whitson River, its tributaries and their flood plains. In their regulatory capacity, the NDCA has been concerned historically with flood flow conditions on the Whitson River. Throughout 2003-2004 discussion on the Stormwater Background Study to the new City Official Plan, the NDCA impressed upon the City the need to reduce flows from developing areas on tributaries to the Whitson River by way of stormwater management. The City agreed with this need and new City policies require stormwater management quantity and quality control for new developments.

Similarly, with the City's 2010 implementation of the Rivest Drain outlet for Municipal Road 80, the NDCA advised the City that compensatory stormwater management would be required in conjunction with the Paquette-Whitson Drain to deal with increased Whitson River peak flows from the Rivest Drain project. It was therefore determined that communal stormwater management facilities would be required within the Paquette-Whitson Municipal Drain to address new subwatershed developments, the Rivest Drain construction and historic high flood flows on the Whitson River. Detailed information on the Whitson River watershed, its historical development, drainage and flood issues is set out in Appendix "B" to this report. A plan of the Whitson River watershed is attached to this report as Appendix "C".

As engineering progressed on the project, it became evident through the development of stormwater computer models and the understanding of the various subwatersheds that the peak flow problem on the Whitson River (particularly upstream of the Municipal Road 80 bridge in Val Caron) was complex with several major contributing factors. Those factors included the impact of flood flows coming over the Vale Whitson Lake Dam and the flood flows emanating from several large upstream tributaries. With this knowledge, the City's Drainage Section, in conjunction with K. Smart Associates, undertook preliminary engineering evaluations for enhanced stormwater control of several upstream catchments including Whitson Lake. These Studies are included as appendices in the overall K. Smart Associates Municipal Drain report and are entitled "Upper Whitson Flood Control Study" and "Whitson Lake Study". The conclusions of these studies outline a proposed future course of action and framework which will significantly reduce peak flows along the Whitson River. An overview of these studies is set out in Appendix "D" to this report.

The Paquette-Whitson Drain Engineer's Report prepared by Kenn Smart, P. Eng. of K. Smart Associates is attached to this report as Appendix "E". The drainage works proposed and recommended include 2,387 metres of new and improved main drainage channel, 665 metres of improved branch drainage channel and a 29 hectare stormwater management pond.

Recreational Attributes

The proposed 29 hectare stormwater pond facility will be a small lake in the heart of the Val Caron community. Over time, the lands surrounding the pond will take on a park-like setting. A future walkway is planned around the ponds and drainage channels to link the existing Dominion Park walkways to the Whitson River area. Although primarily designed for flood control, there is a large potential for both summer and winter recreational use. The facilities would be conducive to canoeing, kayaking, rowing, pedal boats, skating ovals, pond hockey, cross country skiing and winter festivals.

Project Related Spinoffs and Cost Savings

The Paquette-Whitson Municipal Drain Project provides a number of potential cost savings for infrastructure work. It can also lead to the generation of revenue from City land sales. These spinoffs include:

- A cost avoidance of \$590,000 at the Municipal Road 80 – George Street culvert;

- Reduced maintenance of the Municipal Road 80 - Tributary 8A outlet ditch;
- A cost avoidance of \$40,000 for future culvert replacement at Yorkshire Drive, Carol Street and John Street;
- Estimated revenue of \$647,000 from the sale of various City lands currently affected by flood issues;
- Promotion of area economic development, job creation and maximized use of existing sewer/water infrastructure.

Expanded detail on the above spinoffs is set out in Appendix "F" to this report.

Financial Consideration

The total estimated cost of the Paquette-Whitson Municipal Drain Project is \$7,282,885. Developers and property owners with benefitting lands have been assessed \$2,151,500 of the cost of the work. The City has been assessed the remaining cost of \$5,131,385. The City cost includes all property owners within the defined contributing watersheds which have an assessment of \$50 or less. It is anticipated that construction will be completed over a two year time frame. A summer 2013 construction start is anticipated with project completion slated for 2014.

Project Funding

The financial plan for the City share of \$5,131,385 of the project is outlined as follows:

Paquette–Whitson Drain Capital Budget (2010/2016 Capital Budgets)	\$3,500,000
Municipal Drain Reserve Fund	\$1,512,385
Stormwater Reserve Fund	<u>\$119,000</u>
Sub-Total City Budget Allocation	\$5,135,385
Municipal Drain Assessments to Developers	<u>\$2,151,500</u>
Total Budget	\$7,282,885

On July 10, 2012 Council approved Resolution # FA2012-22 which approved a front end financing program for the developers assessments on the Paquette-Whitson Municipal Drain. This program provided that the total amount financed would be recovered from Developers by a per lot or per lot equivalent charge at the time of registration of specific developments or portion of developments. It further provided that the interest rate of 4.5% per annum would be added to the per lot charge rate of \$2,500 for the Paquette-Whitson Municipal Drain with an interest commencement date of January 1, 2015.

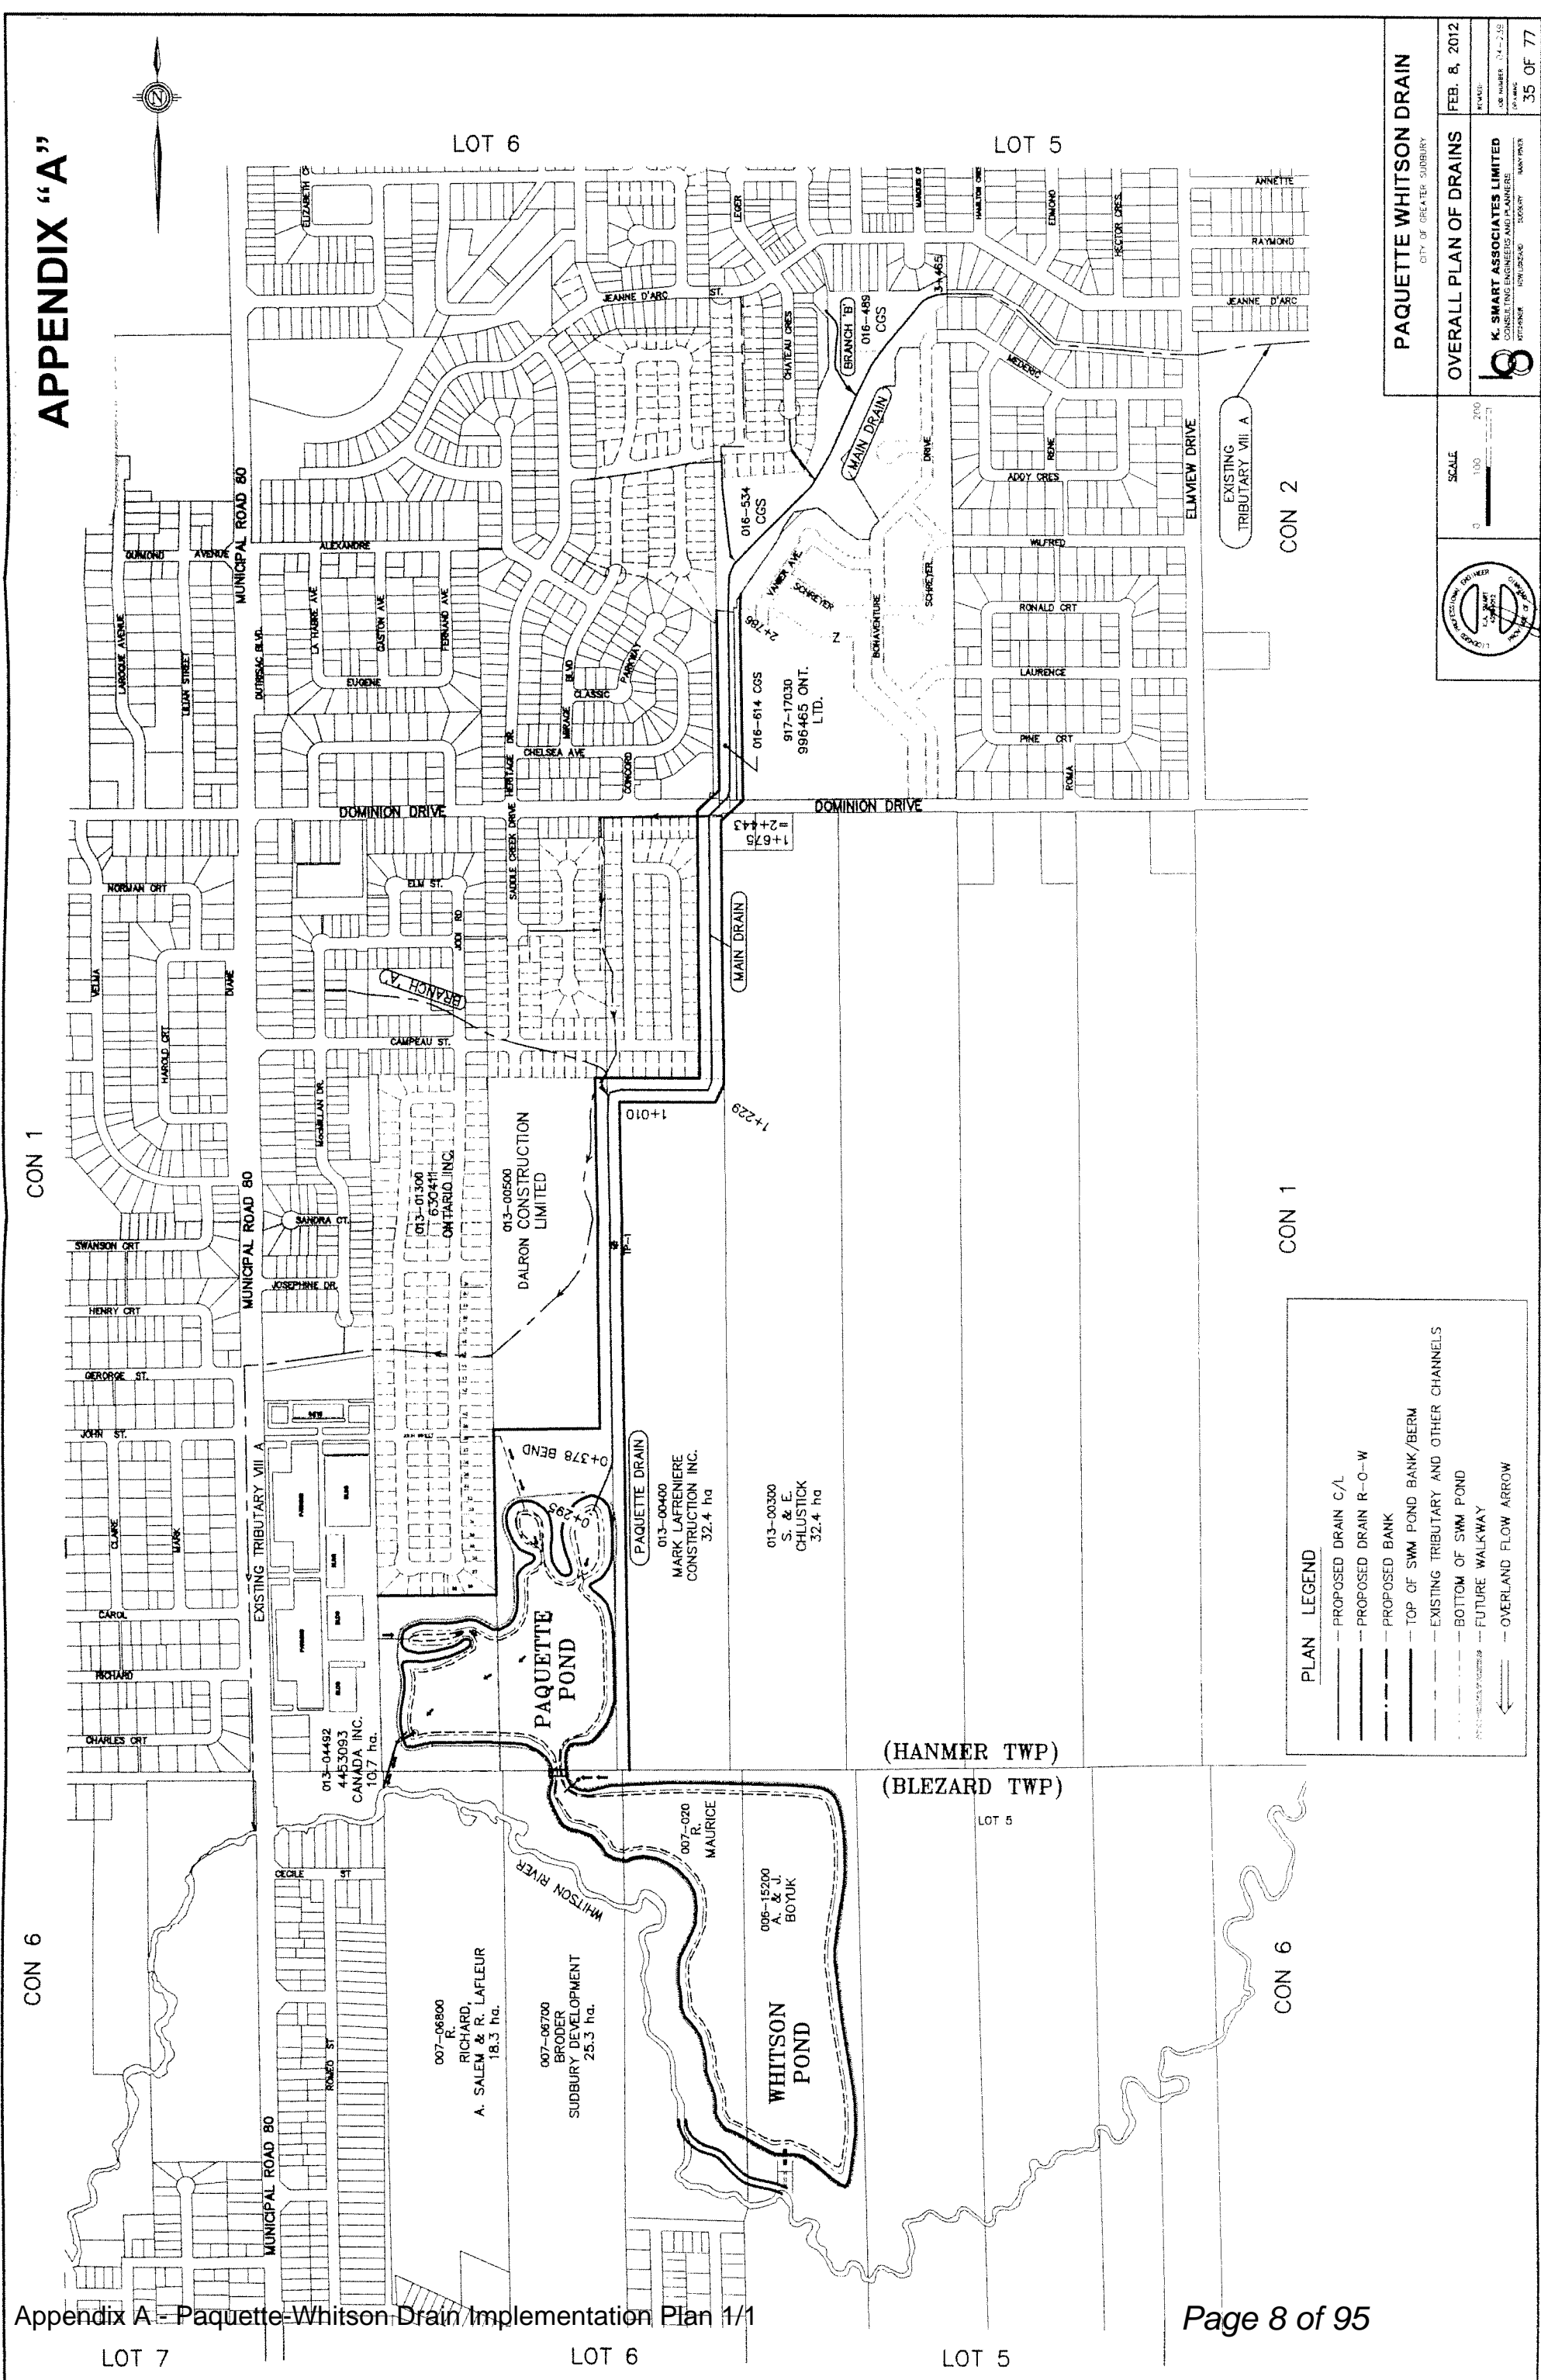

Conclusion

In accordance with the Drainage Act, R.S.O. 1990, K. Smart Associates Limited have conducted several drainage meetings with benefitting landowners and completed an engineer's report to resolve the drainage problems within the subject area. Staff have reviewed the report and recommend the acceptance of the report and cost assessments that it contains. On Wednesday, October 3, 2012, Mr. Kenn Smart, P. Eng. will present his report to the City Hearing Committee. All affected property owners have been invited to the meeting. In accordance with the Drainage Act, this is the public's opportunity to participate in the discussion on the proposed drain.

If no serious objections arise at the meeting, the Hearing Committee should recommend that Council give First and Second reading to the draft By-Law "A BY-LAW TO PROVIDE FOR THE PAQUETTE WHITSON MUNICIPAL DRAINAGE WORKS IN THE CITY OF GREATER SUDBURY". A copy of the draft By-Law is attached to this report as Appendix "F". After the First and Second reading of the draft By-Law, the affected property owners will be advised of the date for the Court of Revision. The Court of Revision is a hearing within which affected property owners can attend

to voice their concern with the monetary assessment of the cost of the drain to their property. This hearing will be adjudicated by City Councillors' Caldarelli, Dutrisac and Kett who have been appointed to the Court of Revision. Once the Court of Revision is complete and all appeals have been addressed, the By-Law will be returned to City Council for Third and Final reading. At that point the drain report is officially adopted.

APPENDIX “B”

WHITSON RIVER WATERSHED BACKGROUND

I. The Whitson River Watershed

The Whitson River is the outlet watercourse which provides natural drainage to a 324 square kilometre area in the northerly area of the City of Greater Sudbury. The river and its tributaries are the remnants of a once large glacial lake. The former lake bottom is the watershed of the river that exists today. The river has its easterly head waters within the Falconbridge community. The main watercourse flows westerly in a meandering fashion a distance of 70 kilometres to its outlet, the Vermillion River. The watershed is a flat plain and the river only drops 53 metres in elevation over its length for a minimal average slope of 0.076 per cent. The river has 11 primary tributaries and scores of secondary tributaries that feed drainage into the main river. Five of those main tributaries are upstream of the Municipal Road 80 Bridge in Val Caron. As the river flows westerly, it passes through the urban communities of Hanmer, Val Caron and Chelmsford.

II. Historical Watershed Development

The Whitson River Watershed area was settled in the early 1900's by pioneers who created farms throughout the area and developed a strong agricultural industry. By the mid 1900's, the communities of Hanmer, Val Caron, Blezard Valley, Azilda and Chelmsford were thriving villages or townships. The 1960's and 1970's saw the first growth of new subdivisions and the implementation of sanitary sewer and water services. Regional government commenced in 1973 and saw the creation of the new, consolidated towns of Valley East and Rayside Balfour. Continued growth in the 1980's and 1990's brought commercial and industrial development. By the year 2000, the once extensive agricultural industry had slowly ebbed. In 2001, Valley East and Rayside Balfour were amalgamated into the new City of Greater Sudbury.

III. Drainage Issues

From the early days of the watershed development, farmers and property owners were battling the annual spring flood water of the Whitson River and its tributaries large and small. The implementation of approximately 170 kilometres of municipal drains under the Ontario Drainage Act in the 1980 to 2010 period has done much to alleviate those conditions. However, the spring flood risk potential on the main Whitson River remains a major issue. The main river is not a wide or deep watercourse. Under certain conditions, the normally quiet, meandering stream can turn into a raging torrent which overflows its banks, causing substantial damage and risk to persons and property. There are two notable occasions in recent times where this occurred.

In the spring of 1985, after a long cold winter with deep snow accumulation, the watershed was suddenly cast into a four day heat spell of 25 to 27 degree centigrade weather. The snow quickly melted and a massive flood occurred along the Whitson River. A normal winter river flow of 1 cubic metre per second peaked at 52 cubic metres per second on April 22, 1985. Many residents had to be rescued from their homes by boats and roads in low lying areas were impassable.

Similarly, in the spring of 1998, another snow laden winter came to an end during a 5 day period at the end of March and early April. In this case, the spring snow meltdown was augmented by 125 mm (5 inches) of rain over the impervious frozen watershed. The result was peak river flows of 45 cubic metre per second and wide spread over topping of the Whitson River banks. This caused bridge and road washouts, flooded industrial park lands and flood water around low lying residential homes.

Although weather conditions and the natural lay of the land are significant contributors to such floods, the construction of urban development within the watershed has a major impact on the peak flow of the river. Recent studies indicate that urban development within the watershed has caused or could cause increased river peak flows by up to 30 to 35 percent from flow levels of the undeveloped era.

As the creation of the new north part of the City continues, it is evident that something must be planned and implemented to protect existing and future residents along the Whitson River and its tributaries.

APPENDIX “D”

Upper Whitson River Flood Control

The City Drainage Section has completed flood control studies on Whitson Lake and the Upper Whitson River Watershed. These studies are incorporated into the K. Smart Associates Paquette Whitson Engineer's Report.

From the Whitson Lake Study, it was shown that the careful operation of the stop log control facility on the Vale Whitson Lake Dam could produce significant reductions in peak Whitson River flows by using the reservoir holding capacity in Whitson Lake to store flood water until the flood event had passed.

Similarly, the Upper Whitson River Study demonstrated that the implementation of stormwater storage impoundments at Radar Road and Tributary 10, Radar Hill and Garson Lake could make major reductions to downstream Whitson River peak flood flows during major storm/spring flood events. Each of the impoundments would rely on the creation of dykes and flow control facilities to hold back flood water until the event had passed.

The study sets out preliminary cost and a potential implementation framework for implementing such facilities.

APPENDIX “E”

K. Smart Associates Engineer's Report

(under separate cover)

APPENDIX “F”

Project Related Spinoffs and Cost Saving

1. The existing 1500 mm diameter corrugated steel pipe culvert at the junction of Tributary 8A and Municipal Road 80, opposite George Street in Val Caron, is substantially undersized and in need of replacement. If the project did not take place, the replacement would be a multiple box culvert with a potential capital cost of approximately \$600,000. As a result of the implementation of the new Drain, the Tributary 8A flows are being diverted from this location. A small road culvert in the order of 600 mm diameter would now replace the existing 1500 mm pipe. The cost saving is \$590,000.00.
2. The existing outlet of Tributary 8A along the west side of Municipal Road 80, from George Street to the Whitson River, is a deep ditch with numerous large-sized road culvert crossings. This ditch is an annual maintenance problem and cost for the City as ice and snow must be removed in the March period to maintain the existing watercourse flow. The depth of the ditch and its close proximity to Municipal Road 80 poses both a potential safety hazard and liability. The annual cost saving for winter maintenance of the ditch is approximately \$3,500 per year. The future cost saving for the replacement of the intersecting road large size cross culverts is approximately \$40,000.
3. The existing Tributary 8A watercourse passes through the City owned property adjacent to the Kingdom Hall on Municipal Road 80. With the diversion of the existing tributary by this project, the ditch across the City land parcel is no longer required and can be filled. The subject land parcel with valuable road frontage can then be marketed by the City. The approximate land value is estimated to be \$200,000.
4. The City owns lots 61 to 64, Plan M-486 on Daniel Avenue in the River Road Subdivision in Val Caron. These lots are in close proximity to the Whitson River and development is hampered by potential Whitson River flood issues. These lots have a frontage of 110 feet. One of the lots is used as a parkette. With the proposals to shift the Whitson River to the north under this project, preliminary discussions with the NDCA indicate that the authority may agree to the severance of said properties to create six 55 foot frontage building lots. These lots could be marketed by the City with a value in the \$60,000 to \$70,000 range per lot for a potential city revenue of \$360,000 plus future development charge revenue of approximately \$87,000.
5. The existing Tributary 8A watercourse crosses Dominion Drive in three 900 mm diameter corrugated steel pipes. Said pipes are substantially undersized and in need of replacement. This project will accomplish that task and provide the outlet for future storm sewers to the east and west of the proposed new culvert crossing. This will make the future job of reconstruction of Dominion Drive a simpler task.
6. As a direct result of the proposed Paquette-Whitson Drainage works, the existing flood plain/watercourse impediments to development in the area north of the Whitson River and east of Municipal Road 80 will be resolved. With the existing subdivisions approved or in the planning process, a minimum of 321 new residential building lots could move forward. The large Cerilli Valley Centre commercial development fronting Municipal Road 80 will bring economic enterprise and new jobs to the community. These new developments will maximize the use of existing sewer and water infrastructure.

APPENDIX “G”

BY-LAW 2012 –

A BY-LAW OF THE CITY OF GREATER SUDBURY TO PROVIDE FOR THE PAQUETTE - WHITSON MUNICIPAL DRAINAGE WORKS IN THE CITY OF GREATER SUDBURY

WHEREAS the former Council of the City of Valley East approved a petition submitted by Ronald W. Norton, P.Eng., Commissioner of Physical Services, for improved road drainage on Dominion Drive, Campeau Street, MacMillan Drive and Rose Court;

AND WHEREAS the Council of the City of Greater Sudbury approved a petition from the owners of property in Lot 6, Concession 1 and Lots 5 and 6, Concession 2, Township of Hanmer and Lot 6, Concession 6 in the Township of Blezard in the City of Greater Sudbury;

AND WHEREAS the Council of the City of Greater Sudbury has procured a report made by K. Smart Associates Limited pursuant to Sections 4 and 8 of the Drainage Act, RSO 1990 and the said report is attached hereto and forms part of this By-Law as Schedule “A”;

AND WHEREAS the estimated total cost of construction of the drainage works is \$7,282,885;

AND WHEREAS the Council is of the opinion that the drainage of the area is desirable;

NOW THEREFORE THE COUNCIL OF THE CITY OF GREATER SUDBURY HEREBY ENACTS AS FOLLOWS:

1. The report by K. Smart Associates Limited dated February 8, 2012 attached hereto as Schedule “A” is hereby adopted and the drainage works as therein indicated and set forth is hereby authorized, and shall be completed in accordance herewith.
2. The City of Greater Sudbury may borrow on the credit of the City in the amount of \$7,282,885 being the necessary amount for construction to the drainage works.
3. All assessments greater than \$50 are subject to the City of Greater Sudbury Front End Financing Program approved by Council Resolution # FA2012-22 which is set forth in Schedule “B” , and forms part of this By-Law;
4. All net assessments which are \$50 or less shall be paid out of the general funds of the City of Greater Sudbury.
5. The schedule of Assessments from the report dated February 8, 2012 is set forth in Schedule “C”, and forms part of this By-Law.
6. This By-Law comes into force and effect upon the passing thereof and may be cited as the “Paquette – Whitson Drain By-Law”.

READ A FIRST AND SECOND TIME IN OPEN COUNCIL this ...day of October 2012.

SCHEDULE “A”

K. Smart Associates Engineer's Report

(under separate cover)

SCHEDULE "B"

Finance and Administration Committee of Council Resolution for Front End Financing

FA2012-22 Belli/Dupuis: WHEREAS the 2011 Horizon Municipal Drain and the Paquette-Whitson Municipal Drain are large drain projects in the Val Caron and Hanmer communities which provide drainage outlet infrastructure for various major residential and commercial developments which will take many years to complete;

AND WHEREAS the City of Greater Sudbury considers it appropriate to provide front end financing for the developer share of said projects;

THEREFORE BE IT RESOLVED THAT the City of Greater Sudbury provide a front end financing program to developers within the 2011 Horizon Municipal Drain and the Paquette Whitson Municipal Drain areas and that the total amount to be financed be \$2,315,990;

AND THAT said amount be funded from the Capital Financing Reserve Fund – Roads;

AND THAT the total amount financed be recovered from developers by a per lot or per lot equivalent charge at the time of registration of specific development or portions of developments;

AND THAT interest at the rate of 4.5% per annum be added to the per lot charge rate of \$1,300 for the 2011 Horizon Municipal Drain area and \$2,500 for the Paquette Whitson Municipal Drain area with an interest commencement date of January 1, 2015.

Horizon 2011 Municipal Drain Public Hearing

Presented To:	Hearing Committee
Presented:	Wednesday, Oct 03, 2012
Report Date	Thursday, Sep 20, 2012
Type:	Public Hearings

Recommendation

THAT the City of Greater Sudbury approve the Engineer's report dated February 8, 2012 from K. Smart Associates Limited for the Horizon 2011 Municipal Drain and give First and Second reading to a draft By-Law to provide for the Horizon 2011 Municipal Drainage Works in the City of Greater Sudbury; and

THAT the City cost share of the project in the amount of \$475,550 be funded from the 2012 Capital Budget for the drainage works all in accordance with the report from the General Manager of Infrastructure Services dated September 20, 2012.

Background

K. Smart Associates Limited completed an Engineer's report for the Horizon Municipal Drain in 2005 in accordance with the Ontario Drainage Act RSO, 1990. The location of the drain is set out on the plan attached to this report as Appendix "A".

The original Engineer's report contained provision for a stormwater management facility on lands west of the end of Third, Fourth and Fifth Streets in Val Caron, which were owned by the City of Greater Sudbury and the former Jushro Developments. Said facility was to serve the proposed adjacent Horizon Park Subdivision and Municipal Road 80.

The main channel of the Horizon Municipal Drain was constructed in the 2006-2007 time period. During this period, Dalron Construction Limited acquired the former Horizon Park Subdivision property as well as several other development properties. A master plan for the new community of Hidden Valley was then created. As a result of this large development proposal, the original stormwater management facility was terminated in lieu of a new facility to serve the proposed Hidden Valley development and surrounding existing City roads, schools and residential developments.

Subsequently, K. Smart Associates Limited was appointed by Council to prepare a Section 78 Amendment to the original Horizon Drain report. A public drainage meeting was held on April 4, 2011 to review the

engineer's design proposal and to discuss the project with members of the public. K. Smart Associates have now completed the Engineer's report and it is attached to this report as Appendix "B" (under separate cover).

A copy of the report has been delivered to each affected property owner. Staff have reviewed the report and recommend the acceptance of the report and the cost assessments that it contains. The Horizon 2011 Municipal Drain implementation plan is shown as Appendix "C", attached to this report.

The amended report recommends the realignment of the main branch (Drain "A") of the original Horizon Drain from the end of Fifth Street to the junction of the main branch with the branch "B" drain and the widening and reshaping of the original main branch (Drain "A") from its junction with branch "B" to a new proposed stormwater management facility.

The proposed new stormwater management facility will be a 3.6 hectare (8.9 acre) pond for the quality treatment of stormwater and for the quantity outlet control of stormwater from the upstream watershed prior to outlet to the Whitson River.

The estimated cost of the proposed works is \$1,060,540. This cost includes \$904,900 for the stormwater management facility, \$92,390 for the realignment of the upper portion of Drain "A", and \$63,250 for outlet works specific to the Dalron Hidden Valley Subdivision. The cost of the work is assessed to the City and Dalron Construction Limited (or related companies).

Dalron Construction Limited's assessed share of the project is \$584,990. On July 10, 2012, by Finance and Administration Committee Resolution # FA2012-22, Council approved a front end financing program for Dalron Construction Limited's assessments on the Horizon 2011 Municipal Drain. This program provided that the amount financed would be recovered from Dalron Construction Limited by a per lot or per lot equivalent charge at the time of registration of specific developments or portions of developments.

The first subdivision phase of 56 lots of Dalron Construction Limited's Hidden Valley Development has been registered and the second phase of 89 lots is going through engineering design approval and could be registered in whole or in part during the 2012/2013 period.

Finance and Administration Committee Resolution # FA2012-22 also provided that the interest rate of 4.5% per annum would be added to the per lot charge rate of \$1,300 for the Horizon 2011 Municipal Drain with an interest commencement date of January 1, 2015.

The City cost assessment for the project is \$475,550 and the 2012 Drainage Capital Budget contains a budget allocation of \$500,000 for this work. The construction of the proposed drainage works is planned for 2013.

Conclusion

On Wednesday, October 3, 2012, Mr. Kenn Smart, P. Eng. will present his report to the City Hearing Committee. All affected property owners have been invited to the meeting. In accordance with the Ontario Drainage Act, this is the public's opportunity to participate in the consideration of the proposed drain.

If no serious objections arise at the meeting, the Hearing Committee should recommend that City Council give First and Second reading to the draft By-Law "A BY-LAW TO PROVIDE FOR THE HORIZON 2011 MUNICIPAL DRAINAGE WORKS IN THE CITY OF GREATER SUDBURY". A copy of the draft By-Law is

attached to this report as Appendix "D".

Said draft By-Law allows for the implementation of the Horizon 2011 Municipal Drainage Works as described in the February 8, 2012 Engineer's Report prepared by K. Smart Associates.

After the First and Second reading of the draft By-Law, the affected property owners will be advised of the date for the Court of Revision. The Court of Revision is a hearing within which affected property owners can attend to voice their concern with the monetary assessment of the cost of the drain to their property. This hearing will be adjudicated by Councillors Caldarelli, Dutrisac and Kett who have been appointed to the Court of Revision.

Once the Court of Revision is complete and all appeals have been addressed, the By-Law will be returned to City Council for Third and Final reading. At that point the drain report is officially adopted.

APPENDIX “D”

BY-LAW 2012 –

A BY-LAW OF THE CITY OF GREATER SUDBURY TO PROVIDE FOR THE HORIZON 2011 MUNICIPAL DRAINAGE WORKS IN THE CITY OF GREATER SUDBURY

WHEREAS the Council of the City of Greater Sudbury in accordance with the provisions of the Drainage Act, R.S.O. 1990, appointed K. Smart Associates Limited to complete a Section 78 Amendment to the 2005 Horizon Municipal Drain Engineer’s Report;

AND WHEREAS the Council of the City of Greater Sudbury has procured a report made by K. Smart Associates Limited and the said report is attached hereto and forms part of this By-Law as Schedule “A”;

AND WHEREAS the estimated total cost of construction of the drainage works is \$1,060,540;

AND WHEREAS the Council is of the opinion that the proposed drainage works is desirable;

**NOW THEREFORE THE COUNCIL OF THE CITY OF GREATER SUDBURY HEREBY ENACTS AS
FOLLOWS:**

1. The report by K. Smart Associates Limited dated February 8, 2012 attached hereto as Schedule “A” is hereby adopted and the drainage works as therein indicated and set forth is hereby authorized, and shall be completed in accordance herewith.
2. The City of Greater Sudbury may borrow on the credit of the City in the amount of \$1,060,540 being the necessary amount for construction of the drainage works.
3. All assessments greater than \$50 are subject to the City of Greater Sudbury Front End Financing Program as approved by Council Resolution # FA2012-22 which is set forth in Schedule “B”, and forms part of this By-Law;
4. The schedule of Assessments from the report dated February 8, 2012 is set forth in Schedule “C”, and forms part of this By-Law.
5. This By-Law comes into force and effect upon the passing thereof and may be cited as the “Horizon 2011 Drain By-Law”.

Finance and Administration Committee of Council Resolution for Front End Financing

FA2012-22 Belli/Dupuis: WHEREAS the 2011 Horizon Municipal Drain and the Paquette-Whitson Municipal Drain are large drain projects in the Val Caron and Hanmer communities which provide drainage outlet infrastructure for various major residential and commercial developments which will take many years to complete;

AND WHEREAS the City of Greater Sudbury considers it appropriate to provide front end financing for the developer share of said projects;

THEREFORE BE IT RESOLVED THAT the City of Greater Sudbury provide a front end financing program to developers within the 2011 Horizon Municipal Drain and the Paquette Whitson Municipal Drain areas and that the total amount to be financed be \$2,315,990;

AND THAT said amount be funded from the Capital Financing Reserve Fund – Roads;

AND THAT the total amount financed be recovered from developers by a per lot or per lot equivalent charge at the time of registration of specific development or portions of developments;

AND THAT interest at the rate of 4.5% per annum be added to the per lot charge rate of \$1,300 for the 2011 Horizon Municipal Drain area and \$2,500 for the Paquette Whitson Municipal Drain area with an interest commencement date of January 1, 2015.
