## **Routine Management Reports**

### **C-1      Willow Ridge Estates Subdivision, Sudbury**

Report dated February 22, 2021 from the General Manager of Growth and Infrastructure regarding Willow Ridge Estates Subdivision, Sudbury.

PL2021-66 Leduc/McCausland: THAT the City of Greater Sudbury's delegated official be directed to amend the conditions of draft approval for a plan of subdivision on those lands described as Part of Parcel 47429 S.E.S. and Parts 4 and 5, Plan 53R-17363, Lots 3 and 4, Concession 6, Township of Broder, File # 780-6/02006, in the report entitled "Willow Ridge Estates Subdivision, Sudbury", from the General Manager of Growth and Infrastructure, presented at the Planning Committee meeting on March 22, 2021 as follows:

1. In Conditions #4, 7, 9, 28, and 39 by replacing 'City of Greater Sudbury' with 'City'.

2. In Conditions #7, 12, 39, 41, 42, 43, and 45 by replacing 'developer', 'applicant' or 'owner/applicant' with 'owner'.

3. By deleting Condition #10 and replacing it with the following:

"10. Prior to the submission of servicing plans, the owner shall, to the satisfaction of the Director of Planning Services, provide an updated geotechnical report prepared, signed, sealed, and dated by a geotechnical engineer licensed in the Province of Ontario. Said report shall, as a minimum, provide factual information on the soils and groundwater conditions within the proposed development. In addition, the report should include design information and recommend construction procedures for storm and sanitary sewers, stormwater management facilities, watermains, roads to a 20-year design life, the mass filling of land, surface drainage works, erosion control, slope stability, slope treatment and building foundations. The geotechnical information on building foundations shall be to the satisfaction of the Chief Building Official and Director of Planning Services and the Nickel District Conservation Authority. Included in this report must be details regarding removal of substandard soils (if any) and placement of engineered fill (if required) for the construction of new homes. The geotechnical engineer will be required to address On-site and Excess Soil Management as required by O. Reg. 406/19. A soils caution agreement, if required, shall be registered on title, to the satisfaction of the Chief Building Official and City Solicitor."

4. By deleting Condition #14, 22, and 23 in their entirety and adding new Condition #48:

"48. A stormwater management report and associated plans must be submitted by the Owner's Consulting Engineer for approval by the City. The report must address the following requirements:

- The underground storm sewer system within the plan of subdivision must be designed to accommodate and/or convey the minor storm flow, that is, the rainfall runoff resulting from the subject site and any external tributary areas using the City's 2 year design storm. The permissible minor storm discharge from the subject development must be limited to the existing pre-development site runoff resulting from a 2 year design storm. Any resulting post development runoff in excess of this permissible discharge rate must be controlled and detained within the plan of subdivision;

- The overland flow system within the plan of subdivision must be designed to accommodate and/or convey the major storm flow, that is, the rainfall runoff resulting from the subject site and any external tributary areas using the City's 100 year design storm or Regional storm event, whichever is greater, without causing damage to proposed and adjacent public and private properties. The permissible major storm discharge from the subject development must be limited to the existing pre-development runoff resulting from a 100 year design storm or Regional storm event, whichever is greater;
- "Enhanced" level must be used for the design of stormwater quality controls as defined by the Ministry of the Environment, Conservation and Parks;
- Stormwater management must follow the recommendations of the Junction Creek Subwatershed Study for the areas of the development located within Junction Creek subwatershed;
- The drainage catchment boundary including external tributary catchments and their respective area must be clearly indicated with any stormwater management plan;
- The final grading of the lands shall be such that the surface water originating on or tributary to the said lands, including roof water from buildings and surface water from paved areas, will be discharged in a manner satisfactory to the General Manager of Growth and Infrastructure;
- Minor storm drainage from the plan of subdivision shall not be drained overland onto adjacent properties; and,
- Existing drainage patterns on adjacent properties shall not be altered unless explicit permission is granted. The owner shall be responsible for the design and construction of any required stormwater management subdivision and the owner shall dedicate the lands for stormwater management works as a condition of this development."

5. By deleting Condition #24 and 25 in their entirety.

6. By deleting Condition #31 and replacing it with the following:

"31. That this draft approval shall lapse on April 23, 2023."

7. In Condition #34, by replacing the word 'Siltation' with 'Sediment and Erosion'.

8. In Condition #41, by replacing "Ministry of Natural Resources and Forestry" with "Ministry of Environment, Conservation and Parks".

9. By adding new Condition #49:

"49. That the owner obtain approval from the Nickel District Conservation Authority for the placement of fill, the alteration of existing grades or any construction activity at this location under the Authority's Development, Interference with Wetlands and Alterations to Shorelines and Watercourses Regulation (Ontario Regulation 156/06) prior to undertaking the proposed works. Following the completion of these works, the Owner shall agree to engage a qualified professional to certify in writing that the works were constructed in accordance with the plans, reports and specifications as approved by the Nickel District Conservation Authority and the City. The owner shall agree to carry out or cause to be carried out the recommendations and measures contained within the plans and reports approved by the Nickel District Conservation Authority and the City."

10. By adding the following note to the conditions of draft approval:

“1. Please be advised that the Nickel District Conservation Authority regulates the hazards associated with natural features and uses the attached mapping as a tool to identify those hazards for the public. Although the Nickel District Conservation Authority makes every effort to ensure accurate mapping, regulated natural hazards may exist on-site that have not yet been identified. Should a regulated natural hazard be discovered as the site is developed, the applicant must halt works immediately and contact Conservation Sudbury directly at 705.674.5249. Regulated natural hazards include floodplains, watercourses, shorelines, wetlands, valley slopes.
