J. Minto,  
Chief Administrative Officer

Date: July 2, 2003

## Report Prepared By

C. Mathieu,  
Manager of Waste Management

## Division Review

Neegan Burnside Engineering and Environmental Ltd. is currently assisting the Whitefish Lake First Nation in developing a long term solid waste management plan. An option that they want to review is the possibility of shipping the waste to a City of Greater Sudbury landfill site.

Whitefish Lake First Nation is located approximately 15 kilometers south west of Sudbury, near Naughton (refer to Appendix A). The small village currently has a population of 340 and currently generates 224 tonnes of waste per year (equivalent to approximately 22 rear garbage packers or approximately .2% of all the garbage disposed at our landfill sites per year).

Due to the geographical location of the Whitefish Lake First Nation, staff is in the opinion that providing assistance would not be detrimental to the City. Any services provide would be at no cost to the City and could perhaps be developed as a new revenue generating opportunity.

If the Wahnapiatae First Nation were also to approach the City with a similar request, staff would also want approval to proceed in the same manner as directed by Council for the Whitefish Lake First Nation.

In summary, staff is proposing the following options for Council consideration:

- 1) Accept no garbage generated outside the boundaries of the City for disposal at our landfill sites;
- 2) Consider acceptance of garbage for disposal at our landfill sites from any area outside the City on a case by case basis (not recommended by staff).
- 3) Only consider acceptance of waste from the Whitefish Lake and Wahnapiatae First Nation as detailed in the following flow chart:

Staff recommends that we limit the acceptance of garbage to First Nation Lands within the boundaries of the City and as detailed in Appendix A.
