

Ramsey Lake – Worth protecting

Funding allocated for watershed study in 2013.

- Council should assign a lead project manager and a deadline for completion to prevent delays in obtaining crucial information about watershed management.

- Conservation Sudbury is equipped to do a watershed study and has lots of data.
- Consult with university & community stakeholders – we're free!

City can be a leader in Low Impact Development

New urban rain garden helps manage stormwater Thunder Bay

City officials say the engineered green space filters runoff, prevents pooling and adds beauty

City officials and volunteers planted the final shrubs in an engineered garden on Memorial Avenue in Thunder Bay on Tuesday. The green space is designed to manage storm water runoff and beautify the area. (Matt Prokopchuk/CBC)

Seed funding for rain gardens –
one in Ramsey Lake watershed, one in the Valley.

Make the link between
stormwater & drinking
water sources.

Slow infiltration of
stormwater into
rain gardens:

- prevents flooding
- cleans water
- replenishes groundwater
- adds biodiversity

Thunder Bay

Thank you
