

The diagram illustrates a T-intersection where Woodbine Avenue meets a main road. The main road is represented by a vertical line with two blue circles at its ends, indicating traffic signals. It has two lanes in each direction, shown by blue arrows pointing up and down. A blue crosswalk is marked on the main road. Woodbine Avenue, shown as a horizontal line, approaches from the left. It has a single lane with a blue arrow pointing right. At the intersection, there is a red octagonal stop sign with the word "STOP" in white. Pedestrian signals are located on both sides of the intersection. On the left side (near the stop sign), the signal shows a blue arrow pointing diagonally up and to the right. On the right side, the signal shows a blue arrow pointing diagonally up and to the left. A blue crosswalk is also marked on Woodbine Avenue.
