Emergency Services Department Strategic Direction and 'Suggested Going Forward Work Plan' Status Update

Recommendation

THAT the Community Services Committee receive this report from the Chief of Emergency Services regarding the status of the strategic direction and 'Suggested Going Forward Work Plan' for the Emergency Service Department.

Background

At its Community Services Committee meeting of February 27, 2012, the Chief of Emergency Services outlined the results of a strategic (high level) review of the City's emergency services needs and capabilities. As a result, an Information Report and a document entitled 'Suggested Going Forward Work Plan' dated February 14, 2012 was submitted and presented to Committee/Council.

Report Prepared By Tim Beadman Chief of Emergency Services *Digitally Signed Jan 9, 13*

Recommended by the Department Tim Beadman Chief of Emergency Services Digitally Signed Jan 9, 13

Recommended by the C.A.O. Doug Nadorozny Chief Administrative Officer Digitally Signed Jan 14, 13

This strategic review contained 38 recommendations having the potential to improve delivery of the City's emergency services or to make service delivery more cost-effective. These recommendations spoke to a wide range of undertakings specific to Fire, Emergency Medical Services, Dispatch Services, integration of services, and succession planning.

Attached you will find an updated version of the 'Suggested Going Forward Work Plan' dated September 17, 2012 which has been shared with all employees in the Emergency Services Department.

For the purpose of this report, there are two recommendations (Comprehensive Review of Fire Services, and the Feasibility Study – Integrated Emergency Communications System) that will require a brief update and one recommendation (Resolve Fire Staffing Shortages – Fire Fleet and the Training and Prevention Sections) that will seek the direction of the Community Services Committee meeting of February 4, 2013.

Recommendation #3 (update) — To undertake a Comprehensive Review of the City's Fire Services was authorized by Committee/Council on February 27, 2012 and now includes Recommendation #4 — Capital Financial Model; #10 — Capital Replacement Program; and #13 — Review of Volunteer Firefighter

Operations; within its scope of work to be completed. This work assignment is well underway with the use of internal staff resources in combination with third party oversight; anticipating the findings sometime in the second or third quarter of 2013.

Recommendation #20 (update) — To undertake a feasibility study to achieve a fully integrated Emergency Communications System was authorized by Committee/Council on March 26, 2012 is well underway with the use of internal staff resources in combination with third party support. Anticipated completion of this task and a submission of a business case for Committee/Council consideration will be in the second quarter of 2013.

Recommendation #2 (update) — Which was recommended by the IBI Group (January 16, 2012) outlined the need for the Chief of Emergency Services and Fire Chief to jointly resolve the current staffing shortages in Fire Fleet, Training, and Prevention Sections. Status of work to date:

- <u>Fleet, Facilities and Apparatus Section</u> internal review supported the need for additional personnel resources for the positions of administrative clerk support, SCBA Technician, and Equipment Vehicle Technician. A realignment of clerical support functions was authorized by the Chief's Office to support the Fire Fleet, Facilities and Apparatus Section within the Department's 2012 budget and approved staffing complement. Regarding the remaining positions within this Section, there is a business case to secure the additional personnel; however, further analysis will be undertaken with the feasibility of consolidating Fire Services and EMS Operations support functions. Until this work is completed, there will be no recommendation of a permanent nature forthcoming on this front.
- <u>Fire Prevention Section</u> at the Community Services Committee meeting of September 17, 2012 the Chief of Emergency Services recommended that a hybrid model of staffing enhancement (career and volunteer) be established in partnership with the City's Building Services Section for a five year period without any impact to the municipal levy. This request was approved by the Finance Committee of Council, and will form part of the Department's 2013 budget cycle. Further, work will continue on formalizing collaboration of the relationship between Fire Prevention and Building Services to clarify roles and responsibilities of municipal staff for the purpose of plan reviews to ensure a timely and effective delivery of services.
- <u>Fire Training Section</u> Fire Training's mandate is to develop, coordinate and deliver programs aligned to firefighters (career and volunteer) with knowledge and skills necessary to safely operate fire services equipment, perform firefighting and respond to emergencies involving medical aid, rescue and hazardous materials operations. The current training staffing complement cannot sustain the responsibilities of the Fire Services requisite training program as defined by the needs of 108 career firefighters and 340 volunteer firefighters operating out of 24 stations over 3,627 square kilometers. A separate report entitled 'Emergency Services Department Pilot Project Proposal to improve Effectiveness and Efficiency of Fire Services Training Section' will be before the Community Services Committee meeting of February 4, 2013.
