Due to a lack of facilities, I am not able to enjoy playing pickleball as often as I would like. Because the facility is only open after school in the evening, it is not always as easy to access as in other communities who offer pickleball in the afternoon. Therefore, it is not the length of time as it is the time of day.

Backyard wood burning. The smoke from the community curtails and often stops our activities, even walking the dog. We are aware of the health concerns with smoke from wood burning. Often even our own backyard and home are totally consumed by wood smoke. We can't smoke cigarettes in a park, but we can have a backyard bonfire and completely cover a kilometre of residential and park area, with harmful wood smoke. When is the last time you observed someone standing over a wood fire, breathing the fumes. As soon as the smoke moves towards them, either standing or sitting, they move immediately. They don't want the smoke in their eyes. But this is ok for everyone else down the street. It is 15 degrees a beautiful evening to walk the dog. No way, I have to turn on the AC and close the windows, the fog of smoke is so thick. So I have just gone and got an address and contacted the fire department. They are dispatching a crew to respond to my burning complaint of the irritation and nuisance from the household I reported. Nice I just spent a weeks wages on sending a crew to tell someone to put out their fire. The walking and hiking trails throughout the region that have been built are dangerous. ATV's and dirt bikes ridden by youth and adults are travelling at outrageous speeds on these trails. With signage that says no motorized vehicles.

<p>Anonymous 9/03/2019 02:45 PM</p>	<p>Due to a lack of facilities, I am not able to enjoy playing pickleball as often as I would like. Because after the summer season is over, there are no facilities available to play indoor Pickleball. This winter there are no rented schools by the local Pickleball Club for indoor play. Other communities offer pickleball in the afternoon and evenings. Sudbury does not have any choice. The city should make available the spaces requires to play pickleball, such as gymnasiums/community centres and outdoor parks with paved and lined courts because the popularity of this sport is growing tremendously province-wide and interests young adults to seniors.

Again I cannot support utilizing monies to create beautiful walking trails, that will be taken over by motorized vehicles. ATV's and dirt bikes are a serious challenge to trail use in the city of Sudbury. The regional police have a rural task for to deal with ATV and dirt bike abuse. However, another waste of time and money. How many fines over the last 20 years. A handful. A handful. Yet I observe everyday, dozens of dangerous operated off road vehicles, joyriding the trails.

Anonymous 9/02/2019 11:32 AM	In general I do not support increasing tax to support this. The city needs to increase revenue and make more centres revenue positive. Parking enforcement should be enhanced - many cars block sidewalks and should be ticketed if 10cm of sidewalk is blocked as in other municipalities, which would bring in tons of money and make sidewalks accessible.
Anonymous 9/02/2019 12:49 PM	I strongly oppose building a new arena. Fix the old one. It would be a lot cheaper.
Anonymous 9/02/2019 02:42 PM	Multi purpose centrally located fitness centre/community hall run by operated by City staff that is large enough to support a cross section demographic including an active older adult. The demographics included in your Master Plan support such a facility. Relying on the YMCA, Cambrian College, Collège Boreal or Laurentian to fill the need is not realistic nor non-profit. The Y cannot meet the needs of the Pickleball community during the indoor season. The GSPA has now ceased to run indoor programming during the school year. In lieu of a newly constructed fitness facility the City needs to actually have in place a Community Use agreement with Schools - the Master Plan suggests that these are in place when in fact they are not in place for fitness activities such as Pickleball.

Anonymous	Our neighbourhood (Wembley) lacks playing fields and play spaces. There are no large playing fields within safe walking distance (kids can't access without crossing busy road). Play spaces are also not adequate to support neighbourhood. Only one small park (Worthington) and barely any open spaces (Alexander PS and the former Wembley PS, neither are very large). We are lucky to have the green/natural spaces we have in this neighbourhood though. I do not believe the York playground services the Wembley area adequately (poor access).

Outdoor rinks should have two reserved nights per week that are dedicated to those who just want to skate. Kids playing hockey is great to see but does not allow others to enjoy the facilities as well. We've also been told that we can share the ice, however, it is ridiculous for someone to think it's ok for someone to leisure skate next to hockey pucks flying all over. There should also be better sitting areas for people to put their skates on and be able to put their bags down without getting their skates and belongings full of snow. A small shack or something. Doesn't even need to be heated.

Chelmsford Phase II has to happen and then Valley East projects need to begin. The use of the Arena at Raymond Plourde evening play was a success this summer and we thank the City for this. We always swim in Copper Cliff because it is the most clean and well run, with super helpful/friendly staff. We drive further to do so but it is worth it. Same thing for the libraries. We live like a 5 mins walk to the Mackenzie Branch and now we rarely go because it feels unloved (especially the kids section is pitiful), 'scary' and unstable people make it their home all day long, it is dirty and we feel uneasy now going there. We really appreciate the free indoor skating. We made use of the downtown arena public skate at least once per week, sometimes two during the whole season. It is wonderful because my partner can join in on his lunch hours. It is a specail time for our family.</p>

Although we are seniors we still strongly support fitness and leisure facilities for all ages to encourage a healthy lifestyle. City should provide opportunities for disadvantaged children to participate in leisure activities as they may be at greater risk of unhealthy lifestyles due to lack of funds for participation and access.

To encourage people to be healthy, lose weight and avoid the line ups at the hospitals, we need to have indoor sport gymnasiums to get our youths engaged and the seniors active again. Presently there are no indoor facilities where the public can play Pickleball year round.

To improve outdoor parks for example replacing the metal slides at the Carling tot playground, they are dangerous as they get very hot in the summer. Add more shading areas. Add more supervision to eliminate tweenagers hanging around at night.

We already use them. However, some areas do need fixes, for example, the soccer fields in Falconbridge have some nasty holes that need filling and would have been noticeable by the person who cuts the lawn but yet they remained unfixed for the entire season. You need inspections done at the beginning of each season for each facility, a mid-season inspection and a end of season inspections. This would ensure that the facilities are monitored and any issues that are arising would be dealt with quickly before they become problems and more expensive to fix.

Lower prices and more effort being put towards Adanac and lively ski hills. Adanac has become a joke, last winter we drove to north bay multiple times because the 1.5 hour drive was worth it for the prices and overall feel/environment at the hill. A nicer chalet with more food options and a small retail shop with hand warmers, socks, mitts and a separate space away from racers so that "the public" who are skiing can actually have a place to sit down

Q16 | What would encourage you or members of your household to make greater use of Greater Sudbury's Parks and Trails?

Anonymous 8/29/2019 04:40 PM	Having a greater increase of trails.
Anonymous 8/29/2019 06:12 PM	Better trails, family member recently spend 5 days in hospital and going back for surgery due to unkempt trails
Anonymous 8/29/2019 06:16 PM	Sudbury's trails are pretty great, we already go as much as we can.
Anonymous 8/29/2019 06:50 PM	Better upkeep and overall maintenance
Anonymous 8/29/2019 07:25 PM	Location, up keep
Anonymous 8/29/2019 08:15 PM	Cycle friendly near my home (Montrose area) and better control of bear population (see them daily in my area with no response from MNR)
Anonymous 8/29/2019 08:36 PM	Improve the scenery, sorta like north bays lakefront. They have a group of individuals who volunteer and plant perennials, engaging our community to make our trails their own.
Anonymous 8/29/2019 08:46 PM	We use many of Sudbury parks and trails and are very happy with them :) again just keep them clean and updated and we will always use them :) thanks again

Anonymous 8/30/2019 10:43 AM	The city does a wonderful and impressive job of maintaining Sudbury's parks and trails...we make regular use of them all the time.
Anonymous 8/30/2019 11:50 AM	none use them often
Anonymous 8/30/2019 12:15 PM	Currently, with the exception of a few trails, the trails are inaccessible to all but mountain bikers and hikers. The City of Sudbury need to look at other Cities like Thunder Bay where they have established a web of paved trails across the City from commuter, bikers, walkers, etc. Sudbury's unpaved trails are dangerous due to trip hazards (roots and rocks) and inaccessible to many including: bikers (other than mountain bikers), runners (other than cross country), motorized and manual wheel chairs and mobility devises, most baby strollers, roller bladers, skateboarders, disabled, elderly. The City should at a minimum pave trails which can be used by commuters. The City should provide lighting along trails such as the one that lead from Downtown Sudbury to the Flour Mill to improve safety. The City needs to ensure that any new roads include sidewalks, designated bike lanes (not routes). The City should improve and pave trails between the City of Sudbury itself and the outlying communities. It wouldn't take a lot to connect Garson or Walden to the City. The others may need additional work. The City needs to ensure trees are trimmed along trails and sidewalk, some sidewalks are near impassable due to trees and bushes overgrowing the sidewalks (Gemmell (near William), and Attlee (near Gemmell, and between Gemmell and Westmount). City should ensure trees are trimmed along trails and sidewalks so people over 5 feet can use them, I'm really tired of being hit in the face by branches.
Anonymous 8/30/2019 04:02 PM	Would like the trail to connect to my neighbourhood so I don't have to drive to the nearest playground. It's walking distance but the traffic moves too fast to feel safe.

Anonymous 8/31/2019 06:59 PM	NO dogs allowed in conservation areas. I go out to enjoy the beauty of nature & leashed trails are over taken by off leashed dogs,scaring hurting wildlife. I have seen dogs running freely on trails where bikers almost crash. I was told by a fireman on his bicycle rounding a curve he just about wiped out due to an off leashed dog.
Anonymous 8/31/2019 09:14 PM	There must be a plan to enforce bylaws and statutory laws, before putting money into trail plans. A trail is great to build for hikers, but even as it is being built, ATV and dirt bike riders will enjoy racing on a new trail. Clean up the air, stop this backyard wood burning. We are killing ourselves. [REDACTED] [REDACTED] Every aspect of earth requires clean air and clean water.

Anonymous 9/02/2019 04:32 PM	City is doing fine
Anonymous 9/02/2019 04:56 PM	Accessible trails in different areas of the city
Anonymous 9/02/2019 05:09 PM	We do make great use already of all the parks and trails around town. We like to hike or bike to new areas and check out their greenspaces. The only thing that really limits use is the risk/exposure to dangerous litter like needles etc....or their users with violent/unstable behaviours. Therefore, we don't use the Rainbow Routes trail that goes from the Lloyd Street hill (small parkette) to the otherside of the Flour Mill near the train tracks anymore along the waterway. We really miss using it but for the last 1.5-2 years, it does not feel safe.

<p>Anonymous 9/03/2019 07:56 PM</p>	<p>Close parking to a facility, easement on no parking signs during the summer months, especially around parks. Parking signs should be adjusted to reflect the seasons and the time of day. A complete overall of no parking signs should be conducted around refurbished courts that are being used by players. Example we need more parking around the O'Connor park due to increase use and new relocation of the Flour Mill Museum. I counted over 22 cars of Pickleball players, 7 cars for the splash pad and 10 cars for the union shop on St. George street. The Better Beginning kids facility was not active that night. Parking was limited due to construction and next year the museum relocation will require additional parking.</p>

More high quality walking trails - Bell Park and Kelly Lake are beautiful, but we have two that I am aware of. Other cities in Southern Ontario have multiple versions of this. Consider closing down streets during summer months for e.g. cycling, pedestrians - like what is done in Ottawa, and connect to trails. Would love to see the rail beds gone from downtown Sudbury and this turned into a trail. Imagine having a coffee shop along the Bell Park Boardwalk! The former Canoe Club building would be an ideal location for a e.g. Twiggs.

We live in the Donovan and have always enjoyed all the parks and play areas etc.. everything always seems to be neat and tidy and maintained. I do feel bad how many kids abuse and damage things but all in all we try to do our part to deter that and notice that the city fixes and cleans things in a timely fashion. Again just want to say thanks and keep up the good work :)

Calgary has a many examples of multi use centres both public and private. Having new modern facilities with new layouts and activities will attract more use. Providing the same barn style of hockey arena or 25 meter 6 lane swimming pool is not progressive. See the Westside Recreation Centre in Calgary as an example of what could be.

City needs to do more to stop off leash dogs in trails, parks and sidewalks (sidewalks are used for leisure). City needs to provide more sidewalks and maintain them. City needs to do more to stop dumping of grass and tree waste. City needs to pave more trails and provide winter maintenance on them. City needs to keep all sidewalks clear and safe for leisure users. City needs to provide indoor and outdoor tracks. City needs to stop allowing private driveways to look like roadways where there are sidewalks, when there are sidewalks the concrete sidewalk should extend across the driveway not be paved over, current practice creates very dangerous situations for walkers. City should not allow Yield signs when there is a sidewalk (Hawthorne), it should be a stop sign.

Disappointed that we, as a city, run public entities that are funded by taxpayers such as Adanac Ski Hill and Lively, while we had privately run services available at no cost to the taxpayers I.e. the Nordic ski hill and more recently Onaping ski hill. With our tax dollars we put these other clubs out of business and now our taxes pay for these ski hills.

Of the 2 dog parks we have, there needs to be better awareness of how they are meant to function : ie people are not supposed to just stand around and smoke but rather you must walk the perimeter to keep dogs focused on moving and not ganging up on new entries to the space. It's about the dogs and not the humans. Dog parks in other cities are amazing shared moments and outside spaces but ours are not usable. Unless you want to smoke with strangers of course.

The population in this city is aging. It does not make sense for the city to invest a lot of money to create new parks, trails and leisure activities as the cost of these services will fall on citizens who will have difficulty paying for them.. It would be wise of the city, instead, to better market the incredible parks and leisure services we already have and to continue to support them. As I indicated earlier, I would strongly urge the city to reinvest in a paper copy Leisure Guide and make it available at libraries in the area for those who prefer a paper copy.

The ball fields are in various states of "broken" including fences, bleachers, divots in the playing area etc and pose a very high risk of injury to anyone using them. The general maintenance and prep of the fields and upkeep of the infields and outfields is minimal. With the grass being overgrown, the infields not groomed regularly, the batters boxes never fixed and are all just hazardous sandboxes of loose dirt, the lines are not always done in time. The lights malfunction...so many issues. The fences are all broken and snag/trip or scratch people.

Sudbury has an obesity issue mixed in with low income. Recreation and leisure should be accessible to those who can't afford in order to promote healthy active living. Make organized sports affordable for those who need it. Also, Sudbury needs more ball fields and the current fields need to be improved. My league had to get piping to put under a back stop because the ball kept rolling under it. The fences are all rusted. The dirt on the infields are rough and will tear your leg open when you slide- yes I know how to slide I've been playing fast pitch for 26 years. It's embarrassing to have teams come play from out of town because the fields are horrible. Also, build the sports dome already and the new arena on the kingway. I hate this city. This is way Sudbury has an aging population because you have nothing cool or fun for the younger population to do. Sorry we don't want to play porketta bingo and drink Clamato juice with beer.

Tball for 4-6 year olds should not be held at Terry Fox. They should be playing in a grass field at a park so others have access to the field. Furthermore, the very young children should be using the ball fields that are smaller (Twin Forks, Selkirk, etc) in order to free up the bigger fields for adult use. The parks department should stop using beach sand in the batter boxes at the fields. It is the incorrect material and it can be hazardous. [REDACTED]

[REDACTED] This should be rectified immediately. It would result in greater use of the fields and far less dissatisfaction. The city should invest in placing proper fencing at ball fields that aren't fenced in. The city should STOP funding additional splash pads located in such close proximity to existing splash pads (eg, new one in New Sudbury which is very close to Ridgemount.

It is important to keep the City clean to make people feel like using any of the facilities. A dirty city makes people feel unsafe. I realize that in some areas people don't give a hoot: they litter, they deface city property, they just don't care---but there are also small businesses that allow their properties to be filthy. In point: the store on the corner of King and Notre Dame. On the other hand, the store across from the Salvation Army always has someone sweeping and cleaning their lot. Why not give them an award for being good business neighbours?

The 6 dedicated Pickleball courts at O'Connor Park have been a tremendous success in the Summer of 2019 but we are already seeing signs that we are outgrowing the facility. Indoor facilities are now lacking and there will be a significant push since GSPA is ceasing indoor programming for a minimum of one year. The Master Plan is misleading when it suggests that there are centrally located fitness centres, community halls and community use agreements for Gymnasiums with schools which might be suitable for an activity for the older adult wishing to engage in an activity such as Pickleball.</p>

We wish swimming lessons were more affordable. 90 dollars plus for 7 or 8 lessons is a lot and adds up if you to keep our child in lessons from September to June. I think we have a large number of parks and playgrounds for a city of our size (just too bad that our neighbourhood doesn't have one). Maybe a study should be done to evaluate the number of parks in one neighbour, and those with more than their share would have one close to 'give it' to another neighbourhood. I know it is not that simple but I am sure some parks are not well used or well loved and the city still needs to maintain them. Copper Cliff pool is the best run pool in the city. We love the downtown arena and Countryside. The winter Ramsey Lake skate path is the greatest! It must remain. Memorial Park is the most well loved and well kept (despite so many undesirable users who litter and loitter). The staff who work at this park do an amazing job of keeping this park 'not scary' to use despite the very real potential for it to slide into an unsafe place. We see the staff all the time, working so hard, and it is because of them that we still feel confident walking down there to use the park for play or for a picnic.

I would love to see a city-run coffee shop or cafe in Bell Park on the water, similar to the one that they have in Peterborough on the riverfront boardwalk. The skate changing room / former yacht club building is an obvious choice - hot chocolate and coffee (along with existing skate change rooms) could be done in the winter months. The City should try to make more and safer cycling opportunities. Using Atlee as an POOR example where cycling lanes were developed. However, because they are not continuous, the design actually created a greater danger because the curbs (& cycling lanes) go in and out. This forces cyclists to move over, unexpectedly closer to the vehicles while drivers are not anticipating cyclists have to move over towards the vehicle traffic. A partial bicycle lane becomes more dangerous than no bicycle lane. In addition, cycling lanes are often not well enough marked/delineated for drivers.

Being a world traveler, we are very disappointed when we return home. Travelling across Canada or to the USA to play Pickleball, we see that Sudbury is way behind in available facilities for an active healthy living year round. Many of these communities are now converting their Indoor and Outdoor Tennis courts to Pickleball to keep up with the demand and popularity. Sudbury has already outgrown the only outdoor Pickleball court at O'Connor Park. We need more outdoor courts like O'Connor Park across the Greater Sudbury area. I hope one day that the city council will realize that a healthy city is better than waiting for a room at our one and only hospital. Would love longer hours for skating change rooms.

I would like to see more pocket parks in neighbourhoods that are established and maintained with the city and localized community groups. Establish a more robust neighbourhood playground system so that neighbourhood children can participate in day programs in their neighbourhood. Discontinue city funded campgrounds and fitness centres. Make all leisure facilities more multiuser friendly buy offering meeting spaces to community groups and clubs for free if there are spaces available and communicate this availability to the public.</p>

Its the ONLY activity that routinely brings together all age groups from kids through seniors, both (all?) genders, and skill levels from beginner recreational to competitive levels. <p>Anonymous 9/04/2019 03:19 PM</p>	<p>Going back to transportation topic. If the outlying areas cannot get to the leisure facilities by using a simple and quick transit system then I don't see the usage increasing. Our geography is so vastly spread out, it makes it difficult to serve all residents, however, increasing service to outlying areas while slightly reducing in-town services to balance it all out would have made an all-around win for the city. You can increase your revenues but it needs to be convenient and linked to other city services so all can enjoy. I am very pleased by Coniston's park, it is beautiful but I need to add that this has everything to do with community involvement and very little to do with city staff. If it weren't for our community volunteers, I am sure that the park itself would attract mostly flies and chipmunks. Also want to add some positive remarks about the baseball diamonds, tennis and basketball courts and the new splashpad, these are used a lot and it warms me to see this.</p>

However, as the population of 50+ it is more difficult to find activities and facilities for this group who are healthy, energetic but would like to do more fun activities geared to lower impact, less stress on the bones. I have discovered Pickleball and absolutely love it. It allows me to get fit, socialize and get in my cardio for my age. I also find Yoga beneficial, however, there is a lack of times and availability and facilities for this too. The Valley East Baseball Association should be granted lands to expand, construct and maintain ballfields for their recreational and competitive youth users. The City is unable to keep up to the requirements and needs of this sport. As such, Valley East Minor Baseball should be allowed to provide this service as stewards. The land use agreement with Sault Ste Marie Baseball and the local City should and could be looked at. There should be a parcel of land or an existing ballfield that Valley East Minor Baseball be allowed (as stewards) to enter a long term user group agreement where they should be allowed & able to expand, construct & maintain the facilities as the City is unable to meet that requirement.

I am an avid recreational and commuter cyclist. I am committed to cycling all year long so the poor facilities and maintenance do not deter me. However it sure would be nice to see more people enjoying this activity. Safety is a huge factor. Please stop piling snow banks on designated paths - provide routes for people to use. Please properly clear recreational paths (stop salting without plowing! it makes a big mess). Bell Park boardwalk is always very well cleared and maintained. Clear other routes the same way to the same degree - and/or designate the boardwalk as an acceptable route so pedestrians do get so upset to see cyclists on that path. I realize this is an

Consider the costs of renting baseball fields in Sudbury vs those in the GTA as just one example. Why hasn't the City been more involved and helpful in developing an indoor bubble? Why would the City simply rely on school boards and a charitable foundation to complete such a structure that is in almost every other community this size in Ontario. Why does the City not take the initiative? The absence of leadership on these issues is shameful. Given the fact that we have an immense amount of land and beautiful nature, I believe that we should have better marked trails and trail maps available online and paper copies. I also think that baseball diamonds would be far more beneficial than having one or two baseball diamonds at one location. The city should also consider putting playgrounds at this facility to accommodate those with children but who still want to participate in sport (I do not have children, but have noticed that this is a major deterrent for those with kids). Additionally, we need to seriously consider having actual sports complexes (even if it means having a few throughout the entire greater area). It would be better for tournaments and (hopefully, if planned well) parking. It could also help accommodate families and overall land use. It would be significantly less expensive for maintenance and salaries as you would have fewer people running the facility (in the long run). I also think that we need to change our ice time prices... Not only are we significantly higher than most Northern Ontario cities, I do not consider anytime after 9:00pm on a weekday "prime time" and therefore those who rent this ice time should not be paying 'prime time' prices. If we want to focus on being a "healthy" city, and one who truly focuses on well-being, then whoever is reading these comments should take them into consideration. We shouldn't be helping private people or companies increase profits. We need to look at where we have access to public land, and really re-evaluate what we want to look like in the next ten years... do we still want to be putting money into arenas such as Cambrian and Carmichael (which aren't even regulation size) or should we truly plan for the future of our city and make some major decisions now to help the greater good in years to come? Thank you for the opportunity to contribute.

A new multi use arena must be built preferably on the Kingsway. Our old arena is in terrible condition and is not worth throwing more money into trying to fix it.

Some parks need more than a mowing and fresh garbage. They need to have cigarette butts cleaned and graffiti removed. Get rid of the metal slides at moonlight beach hot sun plus kids playing in swimsuits results in burns. Same park but plastic slides is fine.

A lot of the parks nearest my family have no shade, I generally head to bell park, just for the option of shade or water or rest areas, we have a small older park in my subdivision, but we don't often stay long because there is no shade on hot days. There is no water park option either, or amenities of any kind.

Love the splash pads, and the walking trails, but there's no need for all the camping trailer in the area that used to be the beach area for families

consolidate the number of facilities you maintain. Expand on the better used / maintained and commit the necessary staff to operate. Volunteers getting too old to keep many going. think multi use more. i.e ridgecrest park has sliding hill, small kids rink, big kids rink, park, could benefit from additional staff and summer facilities, such as pickle ball courts.

Bathrooms at outdoor spaces like playgrounds would enable families to use them more often and be a less stressful experience. Grandparents with mobility issues etc would feel more comfortable to go with their grandchildren knowing that they aren't going to have to rush to a bathroom. People with ibs and other similar issues would be more comfortable. And potty learning toddlers won't miss out.

I'm really hoping that when the arena goes up on Elmview in Hanmer, that the zamboni will be used to enhance the trails. I can see this as a huge attraction, having a skating path. Suggest lighting be installed, too.

This requires both short-term and long-term planning such that we consider that, currently, it makes sense to de-centralize leisure activities to reduce greenhouse gas consumption but the use of electric vehicles might be less costly in the future. Leaving green areas acts as both a carbon sink and gives citizens, particularly those with lower incomes, the opportunity to enjoy the natural environment that the wealthier population now achieves through travel to their cottages. I would like to be sure that everyone takes into consideration that we are on land that is not only traditional indigenous territory but that the land was acquired under agreements that were unjustly drawn up and administered. We owe it the original land owners to ensure that they have a major role in determining the fate of the natural landscape for which they have been caretakers for many centuries.

Pickleball courts would be used a lot in the Valley. Elmview is recommended for both Tennis and Pickleball courts. A great place for Seniors to play and pupil of all ages. Fingers crossed.

I am retired so I have time to participate in leisure activities. I just joined the Parkside Older Adult Centre this fall. However, the city should make available the spaces required to play pickleball, such as gymnasiums/community centres and outdoor parks with paved and lined courts because the popularity of this sport is growing tremendously province wide and interests young adults to seniors. For what I do at this time, leisure is affordable for me but I cannot speak for families with several children. Also, I find membership at the Y is too high for those on limited income. Sports competitions and tournaments gets a lot of people involved and is important for social networks and thereby promotes community involvement and health. As we age, our needs change, so we need access to a variety of activities and programs we can choose from to do what we can to maintain our health - both physical and mental. Our participation in various activities/programs also allows us to maintain a positive social support system and thereby decrease the risk of isolation and depression. But, activities and programs must be kept affordable for all. Otherwise, accessibility becomes limited to those with higher incomes. In my view, the city must do all it can to promote healthy living by maintaining what exists, providing activities and programs geared to all age groups and taking advantage of new trends/focus on what becomes popular. Pickleball has gained momentum in Sudbury and area and the city could do more to provide venues for affordable play, indoors and outdoors. I hope the proposed Dome facility on Notre Dame Avenue becomes a reality before I'm too old to enjoy it!
